🎯 Objective

Aspiring full-stack MERN developer with a strong foundation in web technologies and a passion for crafting clean, responsive user experiences. Looking for an internship opportunity to contribute to real-world applications and grow as a developer.

🧠 Skills

- **Frontend**: HTML, CSS, JavaScript, React, TailwindCSS, Framer Motion
- **Backend**: Node.js, Express
- **Database**: MongoDB
- **Tools**: Git, GitHub, Postman, VS Code, EmailJS
- **Others**: Redux, Responsive Design, REST APIs

💻 Projects

DineFlow
A real-time restaurant management system. Features QR-based ordering, real-time kitchen tracking, and admin controls. Built with MERN stack, Redux, and Socket.IO.

Developer Portfolio
A code-editor-themed portfolio with interactive tabs, animated transitions (Framer Motion), and an integrated contact form using EmailJS. Fully responsive and deployed online.
